

## North Carolina Charlotte Army Missile Plant

---

### ***Facility and Location***

Charlotte Army Missile Plant, an 81 acre site, is an industrial site in downtown Charlotte. During World War II, the quartermaster used the site. Following the war, its mission is unknown. Some manufacturing occurred at the location and the U.S. Army Corps of Engineers is investigating to determine whether ammunition demolition or other potentially contaminating operations occurred.

### ***Media Sampled and Findings***

**Groundwater** — Prior to 2007, seven samples taken from seven wells at one site detected perchlorate from 0.44 to 2.0 ppb. There was no significant difference between the samples collected onsite and upgradient/background samples.

### ***Appropriate Actions***

Not Applicable. All samples were below the EPA and DoD Preliminary Remediation Goal of 15 ppb.
